

Carbon Fund welcomes the Government's updated ETS auction settings

Salt Investment Funds Limited, the manager of the Carbon Fund, welcomes the government decision to adjust the Emissions Trading Scheme (ETS) auction settings late yesterday.

In summary, these changes include:

- Auction price floor settings will rise from the current level of \$33.06 to \$60 in December 2023, with further increases thereafter.
- In December 2023, the price to trigger any release of extra NZU volumes from the Cost Containment Reserve (CCR) will be \$173 rather than the current trigger price of \$82.
- In 2024, the total CCR volume will decrease from 8 million NZUs under the current settings to 7.7 million NZUs, and will continue decreasing in the following years.

The government has accepted most of the Climate Change Commission recommendations from 2022 but has made earlier cuts to the volume of units available at auction thereby smoothing out the steep rate of decline that would have otherwise been needed from 2026.

This table shows the outcome of the decision versus the existing settings:

	2023	2024	2025	2026	2027	2028
